 [Afiroj313501](#)

Summary

Computer Science graduate passionate about **AI agents**, **Generative AI**, and **Machine Learning**. Skilled in **Python**, **Java**, **SQL**, and AI application development, with hands-on experience in computer vision and deep learning projects. Interested in building intelligent, autonomous AI systems using LLMs and MCP while creating scalable software solutions. Eager to apply technical skills and research experience in a dynamic AI or **Software engineering** role.

Education

United International University **Feb 2022- July 2026**
Bsc in CSE Undergraduate
3.12
<https://www.uiu.ac.bd>
Built strong technical expertise in computer science fundamentals, software development, artificial intelligence, and machine learning through academic coursework and projects.

Ghatail Cantonment Public School and Collge **July 2017- April 2019**
Science HSC
5.0
<https://www.gcpsc.edu.bd/>

BBK high School **Jan 2012- March 2017**
Science SSC
5.0

Projects

Airlines Management System **March 2025- July 2025**
Designed and developed an Airlines Management System using Java, JavaFX, JDBC, and MySQL. The system supports flight scheduling, booking, seat selection, ticket management, and secure user authentication.

Extensive Medical Hub **Feb 2024- September 2014**
Developed an Extensive Medical Hub platform providing real-time hospital information, doctor availability, cabin status, blood services, ambulance requests, and pharmacy stock updates through location-based services.

Tour and Travel Managemnet **March 2023- May 2023**
Built a Tour and Travel Management System to manage tour packages, reservations, customer records, and travel information.

Skills

Programming Skill

● ● ● ● ○

Python, Java, C/C++, MySQL

AI/ML

Frameworks & Libraries: TensorFlow, PyTorch, OpenCV, Scikit-learn, Pandas, NumPy

● ● ● ○ ○

Machine Learning, Deep Learning, Computer Vision, AI Agents, Generative AI, LLMs, MCP

Software Development

● ● ● ○ ○

JavaFX, OOP, Git, GitHub, HTML, CSS, JavaScript, Node.js, Express.js

Database

● ● ● ● ○

MySQL, MongoDB

Research

● ● ● ● ○

Deepfake Detection, AI Security, IEEE Technical Writing

Interests

Cyber Security

Publications

Energy-Aware Tool Discovery for Agentic AI with the Model Context Protocol
IEEE Transactions on Sustainable Computing

July 2026

<https://www.computer.org/csdl/journal>
Researched Agentic AI systems using MCP to improve tool discovery, resource efficiency, and sustainability.

Multimodal Deepfake Detection

Researched audio-visual deepfake detection using deep learning with human-in-the-loop verification for improved accuracy and robustness.

Languages

Bangla and English
